

REMARKS

The objections to the specification and abstract are believed corrected.

The cancellation of claims 1-11, and submission of new claims 12-21 is believed to overcome the rejections under 35 USC §112. The features from previous independent claim 3 are now presented as dependent claim 21. The rejection of the subject matter of previous claim 3 under 35 USC §102 is thus believed overcome at least by virtue of the dependence from prior claims believed to be patentable.

The new claims are believed to correct the cited unclear language and errors in antecedent basis. Reconsideration of these claims is therefore solicited.
